

Environmental and Sustainability Policy

CONTROLLED

The leadership of Trederwen Springs 2008 Ltd is committed to producing safe, legal and authentic beverages whilst achieving and sustaining high standards of environmental performance. Our approach to environmental protection takes into account sustainability, social requirements, evolving scientific knowledge and community expectations.

To ensure the continuing success of the business, Trederwen Springs 2008 Ltd is committed to maintaining environmentally responsible work operations in terms of its ethical duty to reduce its impact on ozone depletion, resource depletion, bio-diversity disruption, global warming and waste to landfill.

We will achieve the above commitments in our business operations by:

- Establishing and reviewing environmental objectives and targets, including on carbon reduction, renewable energy, packaging and recycling, water usage and replenishment, and sustainable sourcing periodically to adequately protect the environment.
- Continual improvement in managing environmental issues by routinely identifying, eliminating and/or controlling environmental aspects and impacts in our operations.
- Ensuring our compliance with local and national environmental legislation and regulations, focusing on effectively utilizing resources, energy, minimising waste and air emissions, and preventing pollution everywhere we operate.
- Minimising pollution through recycling of our waste and minimising waste to landfill.
- Continuing to promote sustainable packaging through increasing the recycled content of our packaging, working with local collection partners to collect our packaging for recycling.
- Including environmental strategies and objectives in its business planning process to ensure that management of environmental impact remains an integral part of its operations.
- Training our employees, contractors and visitors to make them knowledgeable about their responsibilities in environmental protection.
- Prevention of environmental pollution, protection of biodiversity and ecosystems whilst promoting climate change mitigation.
- Communicating and making this policy available to our stakeholders including employees, contractors, visitors, customers, suppliers and other interested parties so that we are aware of our mutual obligations to protect the environment.

We will monitor and formally review our progress regarding the implementation of this policy and our commitments at least annually.

The Operations Director has overall responsibility for the maintenance of this policy including review at least annually. All staff and contractors working on our behalf have responsibility and accountability for compliance with this policy.

Approved by Dave Rippon

Operations Director
